👤 ABOUT ME

Frontend Developer with full-time production experience building web applications with React, Next.js, and TypeScript. Experienced in developing reusable UI components, integrating REST APIs, managing application state, and improving frontend performance across customer-experience and consumer-facing products.

💼 WORK EXPERIENCE

Frontend Developer

Feb 2024 – Feb 2025

🏢 **Apex Web Solutions** · Web consulting · UAE · Full-time · Remote

- Developed frontend features across two consumer-facing web products, covering third-party content-provider integrations and session-management flows.
- Built an in-app live-chat feature with real-time message updates.
- Developed the applications with Next.js and TypeScript, using Redux Toolkit and Zustand for state management and Axios for REST API integration.
- Improved frontend performance on media-heavy pages, reducing initial page load times.
- Wrote Storybook entries for shared components and Jest tests for the logic, and reviewed colleagues' pull requests.
- Managed technical SEO, semantic HTML, and release validation across test, staging, and production environments.

Frontend Developer

Jun 2023 – Feb 2024

🏢 **Qmeter** · Startup · Azerbaijan · Full-time · On-site

- Part of the frontend team on **Qmeter**, a customer-experience platform businesses use to collect and analyze feedback across their branches.
- Built the operator side as separately deployed frontends: the feedback template builder, the analytics dashboard, the CMS and ticketing, with React charting libraries for the response statistics.
- Maintained a shared Ant Design component library used across all four applications.
- Built with React, Next.js, and TypeScript, using Redux Toolkit for state management, Axios for REST API integration, and SCSS with styled-components for styling, version-controlled in Bitbucket.

🔧 SKILLS

FRONTEND DEVELOPMENT

Core:	React	Next.js	TypeScript	JavaScript (ES6+)	HTML5	CSS3
UI & Styling:	Tailwind CSS	SCSS/SASS	styled-components	Ant Design	Material UI	
State Management:	Redux Toolkit	Zustand				
Data & Testing:	REST APIs	Axios	Supabase	Jest	Storybook	SEO

TOOLING & ADDITIONAL

Tools & Workflow:	Git	GitHub	Bitbucket	Jira	Figma	Azure Cloud	Agile/Scrum
Backend:	Node.js	Express.js	Python				

🔧 **SELECTED FRONTEND WORK**

Qmeter Feedback Template Builder Frontend

Drag-and-drop form builder within Qmeter, used by businesses to compose their own feedback forms and publish them as QR codes and hosted links for customers.

- Multi-page forms assembled from smiley, star and NPS ratings, voice and media capture, multiple choice, free text and customer-information fields
- Per-question settings panel with live preview: rating scale length, icon and stroke colors, label text, alignment, and follow-up page routing
- Multi-language templates with per-business branding, each published as a separate QR code and hosted link

React Next.js TypeScript Redux Toolkit Ant Design SCSS styled-components

Personal Portfolio & CV Frontend

This site, built with the same stack used in production work. A single source renders both the web page and the print-ready PDF, deployed on Azure Cloud.

Next.js React TypeScript Tailwind CSS SCSS Azure

🎓 **EDUCATION**

M.Sc. European Master on Embedded Intelligence
Nanosystems Engineering (**EMINENT**)

🏆 **Scholarship Holder**

Oct 2024 – Dec 2026

🏛️ **University of Siegen**

Mar 2025 – Dec 2026

Hellenic Mediterranean University

Oct 2024 – Mar 2025

- Thesis: Implementation of a Memristor-Based Neural Circuit.
- Coursework in programming (Python), digital design and embedded systems.
- Circuit design and simulation projects using standard EDA tools.

B.Sc. System Engineering

Sep 2019 – Jun 2023

Azerbaijan State Oil and Industry University · Baku, Azerbaijan

- Graduated with honors (GPA: 90/100).
- Thesis: Integration of Smart Home and Internet of Things using Web Development.
